

BTS-005 | Business Transformation Story

Enterprise Planning Transformation | Integrated Business Planning

*A Phased Journey to Enterprise-Wide Supply Chain
Planning*

01 | Industry: Consumer Goods Manufacturing Business Landscape

Large consumer goods organizations require extensive cross-functional collaboration to plan demand across complex product and distribution portfolios. While Oracle E-Business Suite effectively handles enterprise transactions, achieving advanced planning maturity requires a connected platform to align strategic, tactical, and operational goals.

02 | The Business Opportunity

One Trusted Demand Plan

Unite portfolios into a single, reliable demand view

Smarter Forecasting

Improve forecast accuracy with statistics and business insight

Constraint-Aware Supply Planning

Align manufacturing and procurement while anticipating supply constraints

Connected Decision-Making

Bring Sales, Operations, Finance & Supply Chain together with scenarios and what-if analysis

The objective: Build an enterprise-wide planning ecosystem where every business function plans using a single version of the truth.

03 | Transformation Roadmap

A phased implementation approach enables organizations to progressively strengthen planning maturity while minimizing business disruption.

Phase 1 – Oracle Demand Management Cloud

Planning Focus: Build a reliable and collaborative demand planning process.

Statistical Forecasting

Forecast Collaboration

Demand Analytics

Forecast Accuracy & MAPE

Seasonality

Consensus Forecasting

Phase 2 – Oracle Supply Planning Cloud

Planning Focus: Convert demand into an executable supply plan.

Phase 3 – Oracle Sales & Operations Planning Cloud

Planning Focus: Align enterprise strategy with operational execution

Executive S&OP Reviews

Demand & Supply Reconciliation

Scenario Planning

Financial Alignment

Together, these three phases establish a connected planning ecosystem where operational planning evolves into enterprise-wide business planning.

04 | Business Value Delivered

Organizations adopting this phased planning strategy can expect:

- One connected planning platform
- Improved forecast accuracy
- Consensus demand planning
- Demand and supply synchronization
- Better production and procurement alignment
- Executive scenario planning
- Financially aligned business decisions
- Improved inventory performance
- Cross-functional collaboration
- Higher planning maturity across the enterprise
- A scalable digital planning foundation
